Project Report

Digital literacy Awareness

Name - Ali Abid

Registration no. - 25BCY10155

Branch - B.tech in Cyber Security

Year - First Year

Course Code - CSE0001

Date - 31/3/2026

Introduction

In today’s digital world, having proper digital literacy and professional online communication skills is very important for students. Technology is used in almost every part of academic and professional life, including coding, collaboration, communication, and online security. As a Digital Ambassador, the main responsibility is to spread awareness about safe and responsible use of digital tools and help peers understand how to build a strong and professional digital presence.

This project focuses on developing practical knowledge and awareness in different areas of digital literacy. It includes creating an infographic to explain digital literacy, building a professional student digital portfolio, exploring coding and collaboration platforms, writing professional emails, and understanding cybercrime and online safety. Each task is designed to improve real-world digital skills such as communication, online professionalism, cybersecurity awareness, and responsible use of technology.

Through this project, I was able to learn how to use digital tools effectively, communicate professionally, and understand common online threats. The overall aim of this project is to promote safe, responsible, and productive use of digital platforms among students and prepare them for academic and professional environments in the future.

Task 1: Create a Digital Literacy Awareness Infographic

For Task 1, I created a one-page visual infographic to explain the meaning and importance of digital literacy for students. I used **Canva** as my design tool because it is free, easy to use, and provides many ready-made templates, icons, and layouts that help in creating clean and attractive visual content. The main objective of this infographic was to make my batchmates understand digital literacy in a simple and engaging way so that they can use digital tools responsibly in their academic and personal life.

The infographic covers four main topics: what digital literacy is, useful digital tools for students, safe internet practices, and email etiquette. In the first section, digital literacy is explained as the ability to use digital technology, the internet, and online platforms safely, responsibly, and effectively. The second section highlights useful tools like Google Docs, Google Drive, Canva, Zoom, and GitHub that help students in studying, collaborating, and managing projects. The third section focuses on safe internet practices such as using strong passwords, avoiding suspicious links, protecting personal information, and using trusted websites. The final section explains email etiquette, including writing clear subject lines, using polite language, and maintaining a professional tone.

One interesting part of this task was designing the layout and selecting suitable icons and colors to make the infographic visually appealing. The most difficult part was organizing all the information into a single page without making it look overcrowded while still keeping it easy to read and understand.

DIGITAL LITERACY FOR STUDENTS
BE SMART, SAFE, AND PROFESSIONAL ONLINE

1. WHAT IS DIGITAL LITERACY?

Digital literacy means the ability to use technology, internet, and digital tools safely, responsibly, and effectively for learning and communication.

2. USEFUL DIGITAL TOOLS FOR STUDENTS

- Google Docs – for assignments and notes
- Google Drive – for file storage
- Zoom/Meet – for online classes
- Canva – for presentations and designs
- GitHub – for coding projects

3. SAFE INTERNET PRACTICES

- Use strong passwords
- Do not share personal information
- Avoid suspicious links
- Use trusted websites only
- Enable two-factor authentication

4. EMAIL ETIQUETTE

- Use clear subject line
- Write polite and formal message
- Avoid slang and short forms
- Check grammar before sending
- Add proper signature

Be a Responsible Digital Citizen

Task 2: Student Digital Portfolio

For this task, I created my student digital portfolio by setting up profiles on **GitHub**, **LinkedIn**, and **Kaggle**. I chose these platforms because they are commonly used by students, recruiters, and professionals in the technology field and help in building a strong digital presence.

GitHub is mainly used to store and showcase coding projects, assignments, and repositories, so I created a profile README that includes my name, branch, year, and my learning goals. LinkedIn is useful for building a professional network and sharing academic and career achievements, so I added my education details, degree, and expected graduation year. Kaggle is used for learning data science, participating in competitions, and practicing real-world datasets.

Over the next four years, I plan to regularly upload my coding projects on GitHub, connect with professionals and update my achievements on LinkedIn, and participate in Kaggle competitions to improve my practical skills. These platforms will help me build a strong portfolio, gain experience, and increase my chances of getting internships and job opportunities in the future.

Task 3: Explore Coding & Collaboration Platforms

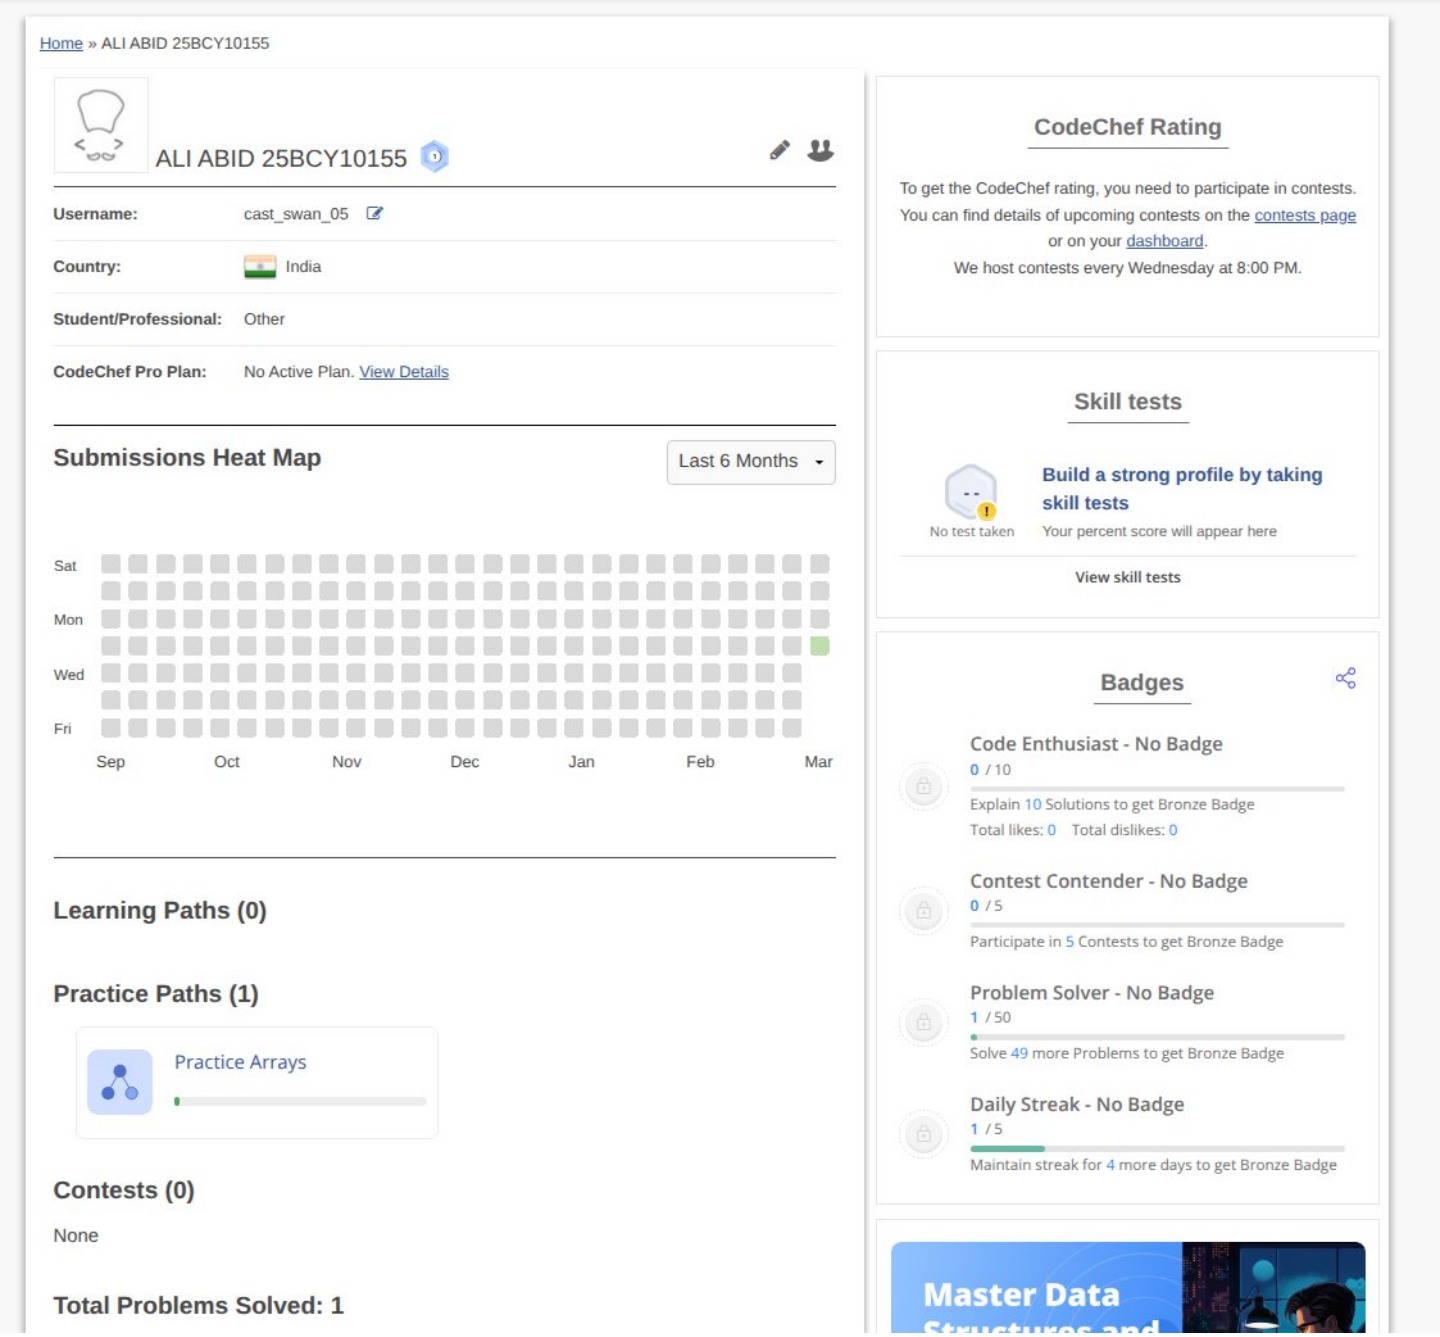
For Task 3, I explored coding and collaboration platforms to understand how they can help students improve their technical and academic skills. For Part A, I created an account on **CodeChef** and completed a beginner-level problem to practice basic programming and problem-solving. This helped me understand how coding platforms provide structured challenges and allow students to improve their logic and programming skills through regular practice and competitions.

For Part B, I used **Google Forms** to create a Digital Literacy Awareness Quiz for my batchmates. The form includes ten questions related to digital literacy, safe internet practices, and professional online behavior. The responses are automatically stored in a linked Google Sheet, which makes it easy to analyze and track answers.

Link for Digital Literacy Awareness Quiz – google form quiz

These tools will help me academically by improving my coding ability, collaboration skills, and data management. In the future, I plan to regularly practice coding challenges and use Google Workspace tools for teamwork, surveys, and academic projects.

Code chef profile and my first practice question



Search an element in an array

You are given an array A of size N and an element X. Your task is to find whether the array A contains the element X or not.

Input Format

- The first line contains two space-separated integers N and X — the size of array and the element to be searched.
- The second line contains all the elements of array A

Output Format

Output "YES" if the element X is present in A, otherwise output "NO".

Constraints

- $1 \leq N, X \leq 10^5$
- $1 \leq A_i \leq 10^5$

Sample 1:

Input	Output
5 3 7 3 5 2 1	YES

C++

```cpp
using namespace std;

int main() {
    // your code goes here
#include <iostream>
using namespace std;

    int N, X;
    cin >> N >> X;

    int a;
    bool found = false;

    for(int i = 0; i < N; i++) {
        cin >> a;
        if(a == X) {
            found = true;
        }
    }

    if(found)
        cout << "YES";
    else
        cout << "NO";

    return 0;
}
```

Test against Custom Input

```
5 3
7 3 5 2 1
```

Sample Input

```
5 3
7 3 5 2 1
```

Your Output

```
YES
```

✔ Hooray, you did it!

Task 4: Draft a Professional Email & Etiquette Guide

Poor digital communication can create serious problems in academic and professional environments. For example, a student once sent an email to a professor without a subject line and used informal language like "Hey" and "Send me extension fast." The professor considered it disrespectful and ignored the request, which resulted in the student losing marks for late submission. This situation shows how important professional email etiquette is in digital communication.

If the student had written a clear subject line, used polite language, and properly explained the reason for the extension, the professor might have considered the request. Using a respectful greeting, structured message, and proper sign-off could have created a positive impression. This example highlights that professional and respectful digital communication helps in building trust and improving academic and career opportunities.

Task 5: Cybercrime Awareness Case Study & Prevention Guide

While researching UPI and online payment fraud, I was surprised to see how easily scammers can trick people using simple methods like QR codes, fake calls, and phishing links. Many victims lose money because they do not understand that scanning a QR code or sharing OTP can lead to direct financial loss. I also learned that most cyber fraud cases happen due to lack of awareness and quick decision-making under pressure.

One important habit I will personally change is carefully verifying payment requests and links before taking any action. I will never share OTP, UPI PIN, or personal information with unknown people and will always use official apps for transactions. This task helped me understand the importance of cyber awareness and responsible digital behavior, which is necessary for every student using online payment systems.
